

# Non Federal U.S. Coin issues deviating from the "Rule of 13 stars"

By

**John H. MacMillan Ph.D.**

The accompanying chart shows non federal U.S. coins and exonomia identified as having stars, but deviating from the "Rule of 13." explained in my previous article on federal issues. Also listed is the probable reason grouped by six different types, identified as A through F, somewhat modified for the non federal issues.

**Type A: Number of states in the Union (or Confederacy) in the year the coins was struck.**

**Type B: A state's order in its ratification of the Constitution.**

**Type C: A state's order in joining the Union (or Confederacy) after the Constitution was ratified.**

**Type D: Number of states in the union at the start of the Lewis and Clark Expedition in 1804. (not applicable here).**

**Type E: Probably artistic license.**

**Type F: Probably Mint error.**

Several interesting questions arose on compiling this list. For example the J.S. Ormsby ten dollar territorial gold piece issued dateless in the "1849" gold rush era has 31 stars on the reverse. California entered the Union in 1850, indicating that the piece was struck actually in 1850 or afterwards. Pacific Company territorial gold dated 1849 has 30 stars, possibly indicating that the pieces were actually struck in that year. Also the LOW 58 HT 16 "Webster Credit Currency" hard times token dated 1841 has 27 stars on the reverse although Florida was not admitted as the 27<sup>th</sup> state until 1845. Was their an error in the star count, or could this "1841" token actually have been struck in 1845 or afterwards? Anyone with insight on these issues please contact me at [jhm@ix.netcom.com](mailto:jhm@ix.netcom.com) .
